# Avoid disaster with a real Disaster Recovery Plan!

A business typically has a business plan that includes a market analysis, financing information, management structure and details regarding the nature of the business. What is often overlooked is how events such as a flood, tornado, fire, freezing rain or even a simple power loss could pose serious problems for the business- maybe even jeopardize its existence. **VOS™ (Virtual Office Systems Inc.)** provides solutions that not only allow businesses to *weather* these uncommon events but delivers the resources that will improve operations every day of the week, 24/7/365!

**VOS™** services are provided through a secure internet connection and the resources are hosted on state-of-the-art systems within enterprise class data centers to provide maximum security, exceptional reliability and a premium service. Clients are able to confidently access their programs & information from the office, home, or from nearly any computer with internet access!

With **VOS™** services, a business has the inherent advantage of a real business continuity plan for their data and applications critical to their existence. Should their office location become temporarily unavailable due to snow, tornado or any other weather related natural disaster - the company systems will still be available from nearly any computer with internet access - ***VOS™ services remain up and available!***

## **VOS™ Advanced Security and Data Protection**

Designed from the ground up with purpose-built facilities, proven technology and advanced resources to provide the most reliable and secure environment for your business continuity.

- Multiple geographically displaced data centers for guaranteed up-time:
  - All **VOS™** data center's are SSAE 16, SOC2 & SAS70 type 2 audited and compliant with HIPAA, PCI-DSS, IRS 1075 and Tier IV data center standards
  - Multi-homed internet connectivity from multiple carriers / carrier-neutral
  - Multiple generators, 30 megawatts of overall power availability
  - Diverse offering of utility substation feeds
  - Blended managed BGP IP offerings (IPv4 and IPv6)
  - Private cages, dedicated data center suites, individual locking cabinets

- Multiple layers of security and authentication including redundant FOB access, PIN and biometric screenings
- Backed by 24/7/365 on-site security, full CCTV surveillance video recording files maintained for 90 days
- **VOS™** equipment maintained in the data centers is composed of the best networking components setup in high availability configurations:
  - Redundant, multi-processor system boards
  - Redundant power components
  - Resilient storage (RAID) configurations
  - Multiple network connections in each system
  - Redundant service configuration (clustering, etc)
- Internet communication for **VOS™** service is protected end-to-end by comprehensive security features:
  - 256-bit SSL/TLS traffic encryption
  - Complex password policy enforced on security credentials
  - Stateful packet inspection of network traffic
- **VOS™** has redundant data repositories kept at geographically separated locations:
  - Replication of data daily within primary data center
  - Replication of data daily between primary and remote data centers
  - Replication of data to tape Monday thru Friday and stored securely offsite

### ***About VOS™:***

**VOS™** is a privately held company established in 2002 with headquarters in Columbus, Ohio. That's over ten years of experience helping clients into the cloud - before the term "Cloud" was even established. Clients are spread throughout the United States, Canada, Mexico, and countries around the globe. Currently **VOS™** has customers in over seven different countries as we continue to rapidly grow both domestically and internationally.

**VOS™** services include "Seamless Web Apps" hosting (business applications i.e. Microsoft® Office Suite, Microsoft® Outlook Email, Intuit® QuickBooks, etc.), secure data storage, remote access, automatic backups, 24x7x365 support and more. We have a unique advantage that we routinely integrate third party applications to create the right solution for businesses to operate their entire IT infrastructure in one place. This allows **VOS™** clients to operate smarter and more efficient.
